2023 - 2024 - 2025

A note from the Siewers Family...

Already the end of August and hopefully the end to those 100 degree days. We hope you have had a chance to take a summer break and are focused on the upcoming busy fall season.

Thank you to Benedictine Schools publication *LABORA* for the wonderful article and photos in the spring issue. We are honored to be a part of the community in preserving the past while building the future.

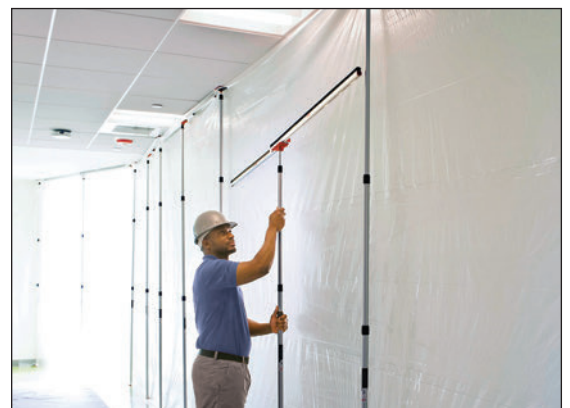

CONTRACTOR NOTES

ZipWall® Dust Barrier System

ZipWall dust barrier system provides dust containment solutions for residential and commercial remodeling and renovation — quick & easy ways to set up plastic barriers, cover doors, create zipper doors, seal a barrier, seal off a hallway, work with negative air, and more.

A ZipWall® Dust Barrier System can be set up in minutes without ladders, tape or damage. Using ZipWall's easy-to-use spring-loaded, twist-locking poles you can build a barrier up to 20' high and as wide as needed. The innovative head and plate design makes attaching plastic sheeting or ZipFast™ Reusable Barrier Panels to the top of the poles a snap.

The ZipWall® Dust Barrier System is ideal for residential and commercial contractors, facilities managers, and homeowners doing remodeling, drywall work, painting, concrete work, lead abatement, mold remediation, and more. Here's the place to see how easy it is to use ZipWall® products.

HOLIDAY HOURS

Labor Day

Siewers Lumber and millwork will be closed Mon, September 1, 2025 in observance of Labor Day. We will reopen Tuesday the 2nd at 7:30am.

SIEWERS CABINET DEPT

Stylish details need to be functional when designing your new kitchen.

Wood countertops are durable and add natural beauty to a kitchen

Cabinet accessories are functional components that improve a cabinet's organization and usability. Storage solutions like pull-out shelves and drawer dividers, and specialized inserts for items like spices, pots, or even trash.

Decorative components for cabinets, including knobs, pulls, hinges, and latches can enhance functionality by providing smooth operation which adds aesthetic appeal, contributing to the overall look and feel of a space.

PRODUCT SHOWCASE

CS Cavity Slider®

The CS Cavity Slider® pocket door frame is a practical solution for those areas where there is not enough space for a swinging door. Unlike other pocket systems, the CS Cavity Slider™ is structurally robust due to its construction from aluminum extrusions. This product is supplied as a kitset and is easy to assemble and install. The pocket frame accommodates 1-3/8" and 1-3/4" doors up to

4'0" x 8'0" and can be cut down to size on site. It can be upgraded to SofStop® soft close. This is suitable for areas where quiet is required, such as bedrooms, offices and patient rooms.

The CS Cavity Slider is suitable for residential and commercial projects as it meets Type 1 construction code without any combustible materials. In addition to its space saving attributes in restrooms, hallways and laundries, it can be used with confidence for architectural feature openings around your project.
