A note from the Siewers Family...

As we move forward and into a new year, we want to take a moment to thank everyone who continues to be part of our journey. Your trust, dedication, and support mean so much to us and play an important role in our continued growth and success.

We remain committed to delivering quality, providing excellent service, and building strong relationships with our employees, customers, and community.

From all of us at Siewers, thank you to our community for making this year one to remember. We hope your season is filled with laughter, cozy moments, and a little bit of magic around every corner.

SIEWERS HISTORY

The original social media platform was the newspaper. Aside from advertising and job postings, readers would learn of building contracts and recieve holiday greetings.

CONTRACTOR NOTES

FastenMaster is PRODriven

FastenMaster is a brand and division of OMG, Inc. built around the “PRO Driven” philosophy, which focuses on designing high-strength, labor-saving fastening and framing solutions specifically for professional contractors, builders, and remodelers.

- TrapEase, the industry’s first non-mushrooming fastener designed specifically for composite decking;
- The hidden deck category with the Cortex Plug System, that leaves no evidence of fasteners on the deck;
- HeadLOK, the industry’s first flat headed structural fastener;
- ThruLOK, the first fastener to eliminate through-bolts by using a unique self-tightening nut to make connections in a fraction of the time;
- TrussLOK (later replaced by FlatLOK), the first fastener to connect multiple beams of LVL single sided, up to 4-ply;
- Tiger Claw TC-G Hidden Deck Clip, the industry’s first stainless steel hidden decking clip for grooved boards;
- TrussBrace, the first truss bracing solution that includes both lateral and diagonal support in one connection;

“By actively listening to our PROs, FastenMaster has helped contractors achieve great success by offering them the very best solutions on the market,” said Web Shaffer, senior vice president and general manager. “Developing productivity solutions through innovation has been our north star during the past 25 years and we expect to deliver even more new and innovative solutions to the market in the next 25 years.”

LedgerLOK®

Code-compliant ledger board fastening made strong and simple.

HeadLOK®

High-performance structural fasteners for a secure hold.

ThruLOK®

The ultimate wood-to-wood fastener for heavy-duty connections.

FrameFAST®

Fast, reliable fastening for structural wood applications.

HOLIDAY HOURS

Thanksgiving
We will be closed Thursday, November 26th and Friday 27th for Thanksgiving. We are very thankful for you and all of our associates who continue to make Siewers Lumber & Millwork successful. We will reopen at 7:30am Monday, November 30th.

Christmas
We will be closing for Christmas at 2:30 PM on Wednesday, December 23rd, and will be closed on Christmas Eve, Thursday, December 24th and again on Friday, December 25th for Christmas. From all your friends here at Siewers, have a Merry Christmas! We will reopen at 7:30am Monday, December 28th.

New Years
We will be closing at 3pm on Thursday, December 31st for New Year’s Eve and will be closed on Friday, January 1st, 2027 for New Year’s Day. From the entire team at Siewers, we thank you for all the business in 2026 and wish you and healthy, happy and prosperous 2027!

2026 ARCHITECTURAL PRODUCTS SHOW

We want to thank all of you for making our 2026 Architectural Products Show a huge success. Siewers is grateful to our Vendors, Architects/Designers and Contractors and their family members that attended this year's event.

PRODUCT SHOWCASE

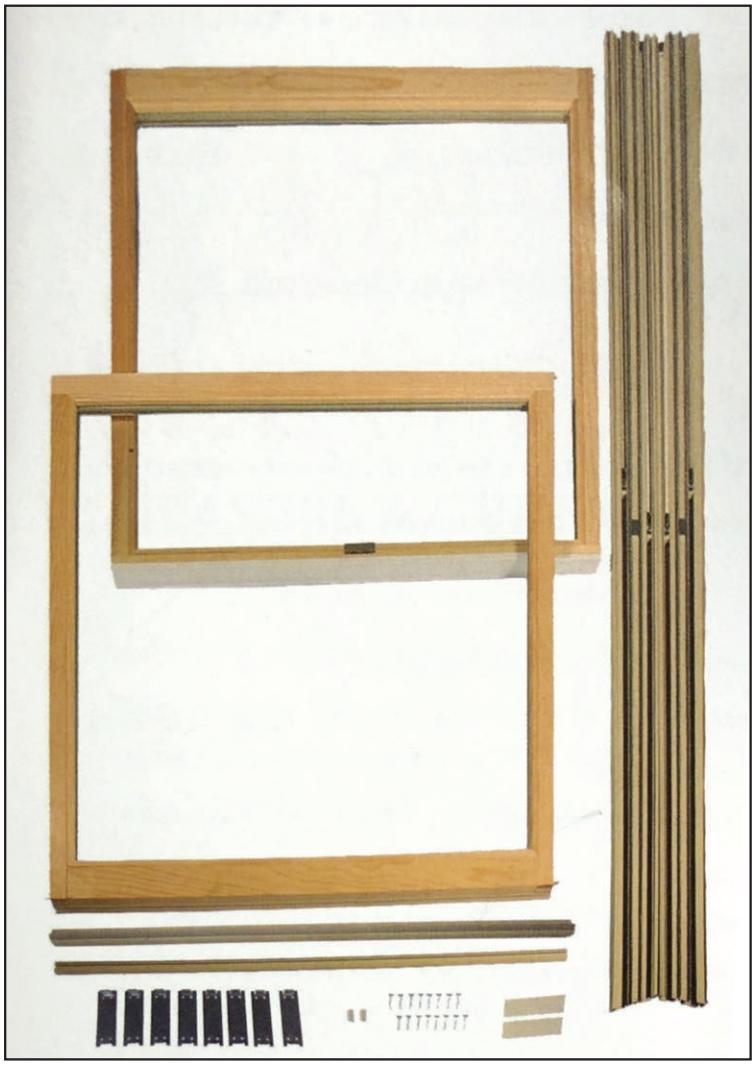

Window Replacements: The Way Your Home Was Designed To Look

Sash replacement kits or Tilt-Pac windows, as they are commonly called, are a great option compared to the full frame replacements for double-hung windows. This alternative allows for replacement of your existing upper and lower sash, without sacrificing glass area – something that is often experienced with these other full framed replacement options. Tilt-Pacs allow you to keep your traditional look which stays true to the architectural integrity in which it was designed.

The Sash replacements or Tilt-Pacs option provides faster installation done from the interior of your home. This makes the process quick, clean and generally requires little to no removal of your trim to complete installation. The existing frames from your original windows will also stay intact both before and after installation, to make this whole process seamless. This allows your home to get the makeover it deserves, without changing the design and style.

These sash replacement kits come in a maintenance free Aluminum Clad Exterior and are available in a wide variety of color finishes. For the interior, you will keep traditional wood that is available unfinished, primed, or prefinished depending on what your particular style requires! In addition, these are available with multiple different glass options as well as different muntin bar sizes and profiles.

These windows are very easy to maintain and clean. They come with a tilt in feature on both the top and bottom sash. No matter what time of the year it is, they can quickly be tilted into the interior of your home for quick cleaning and easily tilted back into the opening when finished.

When you are ready to start your next remodeling project or just want to replace a window or two, please call Siewers to set up an appointment so we can show you all your options.
